

Hybrid Isolator TAP PD

This high quality hybrid component includes in one product three different functions: Isolator, Tap and Photodiode. This allows to save space in design of amplifiers and components that need all these three functions.

FEATURES

- Highly integrated Isolator/TAP/PD
- Super-compact size: $\varnothing 3.0 \times 2.2$
- Customizable tap ratio, 1/2/5/X%
- Provides high directivity for preventing backward optical power into PD
- Low dark current
- Operating temperature range: 0°C to 70°C
